## CLEANING MACHINES

The Professional Cleaners Choice!  
A comprehensive selection of machines with the power, pressure, reliability, and quality that cleaning professionals and semi-professionals demand.

The following is a sample selection of our professional products in this range, a more detailed description can be found by clicking on the product.

**FINANCE AVAILABLE**

**ODOUR ERADICATION MACHINE** This amazing fogging deodoriser eliminates unwanted odours such as tobacco, pet smells and general noxious odours trapped in carpeting, upholstery, hard surfaces and air vents. It uses a highly effective counteractant delivered as a vapourising fog leaving a clean fresh fragrance. (More...)

### **COLD WATER WASHERS - (ARTIC 12C shown)**

Selection of rugged construction cold water washers with powerful electric motors and water pumps that give these machines unsurpassed quality and durability. Features include cleverly designed handles, guns, lances, adjustable nozzles, large capacity detergent tanks, and high pressure 8M hoses. Encased in sturdy polyethylene or heavy duty steel covers. (More...)

### **PETROL & DIESEL POWERED COLD WASHERS - (DPMX15 shown)**

An excellent selection powered by Honda, Yanmar, or Kubota engines. Industrial strength construction with features such as heavy duty tubular frames, recoil start, ceramic plunger pumps, pneumatic wheels, lockable castor & vibration plates, 2:1 reduction gearboxes, chemical injection, and suction feed facility. Accessories include gun/lance and high pressure hose, optional sandblasters, hose reels, drain cleaners and brushes. (More...)

### **HOT PRESSURE WASHERS - (1210HA shown)**

Range of heavy duty and compact machines, powerful enough to make quick work of a variety of cleaning jobs. Professional models fitted with the slowest running motor/pump units available. For reliability, pumps are made by the world's largest manufacturer of high pressure pumps for cleaning. Features include automatic stop, timed shut down, flame timeout, thermal overload, and warning lights. (More...)

### **HOT & COLD PRESSURE WASHERS - (Mk4 Executive Compact shown)**

Designed for users who need the best from hot and cold pressure washers, we've selected tough and reliable machines that require a very economical capital outlay, yet entail low operating costs. Look for safety features like automatic stop, timed shut down, flame timeout, thermal overload protection, and warning lights. Add on extras like automatic water softener. (More...)

**PETROL & DIESEL POWERED HOT WASHERS - (NDHM30C w/hose reel shown)**

Chassis constructed from heavy duty zintec. Box section with stainless steel covers and painted mesh side panels. Twin axle with inflatable tyres for ease of manoeuvrability. Stainless steel water tank. Zintec fuel tank. Engine & heater coil independently mounted on anti vibration pads. Generates its own 110 volt power for the burner system. (More...)

---

**STATIC HOT HIGH PRESSURE WASHERS - (Tamperproof shown)**

Our choice of static, cabinet, forecourt, and/or token-operated machines can be positioned inside or outside and can be fixed to the floor for added security. Tamper-proof features and security with the lockable control panel door for anti-vandalism and total control by key holder. The strong lockable cabinets are manufactured from Zintec or stainless steel and are frost protected. (More...)

---

**WET & DRY VACUUM CLEANERS AND EXTRACTORS - (Falcon 60L shown)**

Ultra quiet yet powerful range of vacuum cleaners that can be used for either wet or dry applications. Choose tipper chassis, spraying and scrubbing, upholstery and carpet cleaning features. Professional tool kits complement these machines that are used by operators in the commercial cleaning market, homes, and hospitals. (More...)

---

**SCRUBBER DRIERS - (50B shown)**

Replace mops and buckets and even your carpet cleaner with the right machine for your needs. Whether your area is small, medium, or large, a scrubber drier will make quick and efficient work in washing and drying any indoor or outdoor flooring surface. - (More...)
